INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference 80135/WO	FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/EP00/01797	International filing date (day/month/year) 02/03/2000	Priority date (day/month/year) 11/03/1999
International Patent Classification (IPC) or national classification and IPC A61K35/74		
Applicant SOCIETE DES PRODUITS NESTLE S.A. et al		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 9 sheets, including this cover sheet.

- ☒ This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of 2 sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☒ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☒ Certain documents cited
- VII ☒ Certain defects in the international application
- VIII ☒ Certain observations on the international application

Date of submission of the demand 22/09/2000	Date of completion of this report 28.03.2001
Name and mailing address of the international preliminary examining authority:  European Patent Office D-80298 Munich Tel. +49 89 2399 - 0 Tx: 523656 epmu d Fax: +49 89 2399 - 4465	Authorized officer Fayos, C Telephone No. +49 89 2399 2180 

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP00/01797

I. Basis of the report

1. This report has been drawn on the basis of *(substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments (Rules 70.16 and 70.17).)*:

Description, pages:

1-19 as originally filed

Claims, No.:

1-10 with telefax of 28/02/2001

Drawings, sheets:

1/5-5/5 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP00/01797

☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

II. Priority

1. ☐ This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:

☐ copy of the earlier application whose priority has been claimed.

☐ translation of the earlier application whose priority has been claimed.

2. ☐ This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid.

Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date.

3. Additional observations, if necessary:

see separate sheet

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims	5
	No: Claims	1-4 and 6-10
Inventive step (IS)	Yes: Claims	-
	No: Claims	1-10
Industrial applicability (IA)	Yes: Claims	1-10
	No: Claims	-

2. Citations and explanations
see separate sheet

VI. Certain documents cited

1. Certain published documents (Rule 70.10)

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP00/01797

and / or

2. Non-written disclosures (Rule 70.9)

see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:
see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:
see separate sheet

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/EP00/01797

Re Item II

Priority

- 1- The priority date (11.03.1999) of the present application is valid.

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 2- Reference is made to the following documents:

- D1: EP-A-0 577 903 (NESTLE SA) 12 January 1994 (1994-01-12) cited in the application

ISSN: 0277-2116

NOVELTY - Art. 33 (1) and (2) PCT

3- Claims 1-5 and 7-13 are not novel for the following reasons:

- Note:
- Claims 1-4 are product claims. A product (here a Lactic acid bacterium strain belonging to the genus *Lactobacillus*) is only defined by its components / elements and not by its intended use ("preventing colonization of the intestine with pathogenic bacteria causing diarrhoea and preventing infection of intestinal epithelial cells by rotaviruses"). Lactic acid bacterium strains belonging to the genus *Lactobacillus* are well known (see below), in particular *Lactobacillus rhamnosus* or *Lactobacillus paracasei*.
 - Claims 5-7 and 9-10 merely refer to the preparation of an ingestible support material containing the product of any of claims 1-6 (well known - see below).
 - Claim 8 refers to the use of a preparation according to any of claims 7-10 for the treatment and / or prophylaxis of disorders associated with diarrhoea (well known - see below).
 - "capable to grow in the presence of up to 0,4 % bile salts" is considered a parameter, by which a Lactic acid bacterium strain belonging to the genus *Lactobacillus* can be characterized, in this case.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/EP00/01797

- 3.4- D5 discloses the use of Lactobacilli (belonging to the species Paracasei and Salivarius) capable of adhering to the cells of the intestinal mucosa and stable to bile juices (see p 4 lines 4-5 - 0,5% bile salts) for the manufacture of compositions (10^6 - $3 \cdot 10^9$ c.f.u. per unitary dose) such as milk and yogurt for the treatment of e. g. diarrhoea (p 4 line 24 - p 6 line 35).

Therefore, in the light of D5, claims 1-3 and 5-10 are not novel.

- 3.7- Lactobacillus paracasei CNCM I-2116 (NCC 2461) appears to be formally novel over the cited prior art, since it is not strictly disclosed in any of the available prior art documents. Hence, claim 4 can be considered as being novel over the cited prior art.

INVENTIVE STEP - Art. 33 (1) and (3) PCT

- 4- Claims 1-3 and 5-10, which are not novel, cannot be considered as being inventive, and claim 4 lacks inventive step for the reasons stated below.**

- 4.1- The closest prior art is represented by D5.

The closest prior art differs from the present application in that it does not explicitly mention Lactobacillus paracasei CNCM I-2116 (NCC2461)

The technical effect achieved in the present application is the prevention of colonization of the intestine with pathogenic bacteria causing diarrhoea and the prevention of infection of intestinal epithelial cells by rotaviruses, using Lactobacillus paracasei CNCM I-2116 (NCC 2461).

The objective problem posed in the present application is to provide additional bacterial strains that exhibit properties beneficial for man and / or animals.

The solution proposed is Lactobacillus paracasei CNCM I-2116 (NCC 2461).

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/EP00/01797

Lactic acid bacterium strains belonging to the genus *Lactobacillus* such as *Lactobacillus rhamnosus* or *Lactobacillus paracasei* are known and have been used for therapeutical purposes.

- 4.2- The *Lactobacilli* of D5 have the following characteristics: stability to acids, stability to bile juices, capability of adhering to cells of the intestinal mucosa, and capability of producing only (or anyway in high prevalence) L(+) lactic acid (p 4-5). Furthermore, it is to be noted that *Lactobacilli* in general are catalase negative and gram positive and are either homofermentative (produce lactic acid) or heterofermentative (produce ethyl alcohol, CO₂, and often other acids in addition to lactic acid).

The *lactobacilli* of D5 are also isolated from human faeces (see e. g. p 3 line 23) and share typical structural and functional characteristics with the *Lactobacillus paracasei* strain of the present application, i. e. CNCM I-2116.

Since the present application does not provide any technical data concerning the isolation and characterization of *L. paracasei* CNCM I-2116 (see examples), which would differentiate it from the *lactobacilli* identified in D5, there is no reason to believe that *L. paracasei* CNCM I-2116 is functionally different from the strains of D5.

- 4.3- The subject matter of claims 1-10 is therefore obvious in the light of D5.
- 4.4- Further note that, although none of D1-D4, D6-D7 and D11 explicitly mention that the Lactic acid bacteria belonging to the genus *Lactobacillus* they disclose are capable to grow in the presence of up to 0,4% bile salts, it is obvious that, when aiming at providing a bacterial preparation having a positive effect in the intestine of a subject, the skilled man would only have selected those strains which are capable of growing in the presence of up to 0,4% bile salts. Hence, any of D1-D4, D6-D7 and D11, alone or in combination with D5 also anticipate the subject matter of the present application.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/EP00/01797

Re Item VI

Certain documents cited

5- Certain published documents (Rule 70.10): D8

Application No Patent No	Publication date (day/month/year)	Filing date (day/month/year)	Priority date (valid claim) (day/month/year)
WO 99/29833	17.06.99	08.12.98	08.12.97

Re Item VII

Certain defects in the international application

- 6- The relevant prior art should be identified in the description (Rule 5.1(1)(a)(ii) PCT).
- 7- It is not clear from the description of the present application that ST11 corresponds to the L. casei strain CNCM I-2116, since the specification therefor first appears on p 6 § 3 (Art. 5 PCT).

Re Item VIII

Certain observations on the international application

- 8- There appears to be an inconsistency between the claims (e. g. claims 4-6) and the description (e. g. p 6 § 3-4 among others) since the claims refer to Lactobacillus paracasei and the description refers to lactobacillus casei.

PATENT COOPERATION TREATY

PCT

INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference 80135/WO	FOR FURTHER ACTION see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No. PCT/EP 00/ 01797	International filing date (day/month/year) 02/03/2000	(Earliest) Priority Date (day/month/year) 11/03/1999
Applicant SOCIETE DES PRODUITS NESTLE S.A. et al		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 4 sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

1. Basis of the report

a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

☐ the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing :

☐ contained in the international application in written form.

☐ filed together with the international application in computer readable form.

☐ furnished subsequently to this Authority in written form.

☐ furnished subsequently to this Authority in computer readable form.

☐ the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

☐ the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2. ☐ **Certain claims were found unsearchable** (See Box I).

3. ☐ **Unity of invention is lacking** (see Box II).

4. With regard to the **title**,

☐ the text is approved as submitted by the applicant.

☒ the text has been established by this Authority to read as follows:

LACTIC ACID BACTERIA STRAINS CAPABLE OF PREVENTING DIARRHOEA

5. With regard to the **abstract**,

☒ the text is approved as submitted by the applicant.

☐ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

☐ as suggested by the applicant.

☐ because the applicant failed to suggest a figure.

☐ because this figure better characterizes the invention.

☒ None of the figures.

INTERNATIONAL SEARCH REPORT

International Application No

	--- -/--	

☒ Further documents are listed in the continuation of box C.☒ Patent family members are listed in annex.

° Special categories of cited documents :

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

"&" document member of the same patent family

NOTIFICATION OF TRANSMITTAL OF
THE INTERNATIONAL PRELIMINARY
EXAMINATION REPORT

(PCT Rule 71.1)

Date of mailing
(day/month/year) 28.03.2001

Applicant's or agent's file reference
80135/WO

IMPORTANT NOTIFICATION

International application No.
PCT/EP00/01797

International filing date (day/month/year)
02/03/2000

Priority date (day/month/year)
11/03/1999

Applicant
SOCIETE DES PRODUITS NESTLE S.A. et al

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

International Patent Classification (IPC) or national classification and IPC A61K35/74		
Applicant SOCIETE DES PRODUITS NESTLE S.A. et al		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 9 sheets, including this cover sheet.

☒ This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of 2 sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☒ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☒ Certain documents cited
- VII ☒ Certain defects in the international application
- VIII ☒ Certain observations on the international application

Date of submission of the demand 22/09/2000	Date of completion of this report 28.03.2001
Name and mailing address of the international preliminary examining authority: <div style="display: flex; align-items: center;"> <div> European Patent Office D-80298 Munich Tel. +49 89 2399 - 0 Tx: 523656 epmu d Fax: +49 89 2399 - 4465 </div> </div>	Authorized officer Fayos, C Telephone No. +49 89 2399 2180

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP00/01797

I. Basis of the report

1. This report has been drawn on the basis of *(substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments (Rules 70.16 and 70.17).)*

Description, pages:

1-19 as originally filed

Claims, No.:

1-10 with telefax of 28/02/2001

Drawings, sheets:

1/5-5/5 as originally filed

2. With regard to the **language**, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language: , which is:

- ☐ the language of a translation furnished for the purposes of the international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
- ☐ the claims, Nos.:

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP00/01797

☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

(Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.)

6. Additional observations, if necessary:

II. Priority

1. ☐ This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:

☐ copy of the earlier application whose priority has been claimed.

☐ translation of the earlier application whose priority has been claimed.

2. ☐ This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid.

Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date.

3. Additional observations, if necessary:
see separate sheet

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes:	Claims	5
	No:	Claims	1-4 and 6-10
Inventive step (IS)	Yes:	Claims	-
	No:	Claims	1-10
Industrial applicability (IA)	Yes:	Claims	1-10
	No:	Claims	-

2. Citations and explanations
see separate sheet

VI. Certain documents cited

1. Certain published documents (Rule 70.10)

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/EP00/01797

and / or

2. Non-written disclosures (Rule 70.9)

see separate sheet

VII. Certain defects in the international application

The following defects in the form or contents of the international application have been noted:
see separate sheet

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:
see separate sheet

Re Item II

Priority

- 1- The priority date (11.03.1999) of the present application is valid.

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- 2- Reference is made to the following documents:

NOVELTY - Art. 33 (1) and (2) PCT

3- Claims 1-5 and 7-13 are not novel for the following reasons:

- Note:
- Claims 1-4 are product claims. A product (here a Lactic acid bacterium strain belonging to the genus *Lactobacillus*) is only defined by its components / elements and not by its intended use ("preventing colonization of the intestine with pathogenic bacteria causing diarrhoea and preventing infection of intestinal epithelial cells by rotaviruses"). Lactic acid bacterium strains belonging to the genus *Lactobacillus* are well known (see below), in particular *Lactobacillus rhamnosus* or *Lactobacillus paracasei*.
 - Claims 5-7 and 9-10 merely refer to the preparation of an ingestible support material containing the product of any of claims 1-6 (well known - see below).
 - Claim 8 refers to the use of a preparation according to any of claims 7-10 for the treatment and / or prophylaxis of disorders associated with diarrhoea (well known - see below).
 - "capable to grow in the presence of up to 0,4 % bile salts" is considered a parameter, by which a Lactic acid bacterium strain belonging to the genus *Lactobacillus* can be characterized, in this case.

- 3.4- D5 discloses the use of Lactobacilli (belonging to the species Paracasei and Salivarius) capable of adhering to the cells of the intestinal mucosa and stable to bile juices (see p 4 lines 4-5 - 0,5% bile salts) for the manufacture of compositions (10^6 - $3 \cdot 10^9$ c.f.u. per unitary dose) such as milk and yogurt for the treatment of e. g. diarrhoea (p 4 line 24 - p 6 line 35).

Therefore, in the light of D5, claims 1-3 and 5-10 are not novel.

- 3.7- Lactobacillus paracasei CNCM I-2116 (NCC 2461) appears to be formally novel over the cited prior art, since it is not strictly disclosed in any of the available prior art documents. Hence, claim 4 can be considered as being novel over the cited prior art.

INVENTIVE STEP - Art. 33 (1) and (3) PCT

- 4- **Claims 1-3 and 5-10, which are not novel, cannot be considered as being inventive, and claim 4 lacks inventive step for the reasons stated below.**

- 4.1- The closest prior art is represented by D5.

The closest prior art differs from the present application in that it does not explicitly mention Lactobacillus paracasei CNCM I-2116 (NCC2461)

The technical effect achieved in the present application is the prevention of colonization of the intestine with pathogenic bacteria causing diarrhoea and the prevention of infection of intestinal epithelial cells by rotaviruses, using Lactobacillus paracasei CNCM I-2116 (NCC 2461).

The objective problem posed in the present application is to provide additional bacterial strains that exhibit properties beneficial for man and / or animals.

The solution proposed is Lactobacillus paracasei CNCM I-2116 (NCC 2461).

Lactic acid bacterium strains belonging to the genus *Lactobacillus* such as *Lactobacillus rhamnosus* or *Lactobacillus paracasei* are known and have been used for therapeutical purposes.

- 4.2- The *Lactobacilli* of D5 have the following characteristics: stability to acids, stability to bile juices, capability of adhering to cells of the intestinal mucosa, and capability of producing only (or anyway in high prevalence) L(+) lactic acid (p 4-5). Furthermore, it is to be noted that *Lactobacilli* in general are catalase negative and gram positive and are either homofermentative (produce lactic acid) or heterofermentative (produce ethyl alcohol, CO₂, and often other acids in addition to lactic acid).

The *lactobacilli* of D5 are also isolated from human faeces (see e. g. p 3 line 23) and share typical structural and functional characteristics with the *Lactobacillus paracasei* strain of the present application, i. e. CNCM I-2116.

Since the present application does not provide any technical data concerning the isolation and characterization of *L. paracasei* CNCM I-2116 (see examples), which would differentiate it from the *lactobacilli* identified in D5, there is no reason to believe that *L. paracasei* CNCM I-2116 is functionally different from the strains of D5.

- 4.3- The subject matter of claims 1-10 is therefore obvious in the light of D5.
- 4.4- Further note that, although none of D1-D4, D6-D7 and D11 explicitly mention that the Lactic acid bacteria belonging to the genus *Lactobacillus* they disclose are capable to grow in the presence of up to 0,4% bile salts, it is obvious that, when aiming at providing a bacterial preparation having a positive effect in the intestine of a subject, the skilled man would only have selected those strains which are capable of growing in the presence of up to 0,4% bile salts. Hence, any of D1-D4, D6-D7 and D11, alone or in combination with D5 also anticipate the subject matter of the present application.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/EP00/01797

Re Item VI

Certain documents cited

5- Certain published documents (Rule 70.10): D8

Application No Patent No	Publication date (day/month/year)	Filing date (day/month/year)	Priority date (valid claim) (day/month/year)
WO 99/29833	17.06.99	08.12.98	08.12.97

Re Item VII

Certain defects in the international application

- 6- The relevant prior art should be identified in the description (Rule 5.1(1)(a)(ii) PCT).
- 7- It is not clear from the description of the present application that ST11 corresponds to the L. casei strain CNCM I-2116, since the specification therefor first appears on p 6 § 3 (Art. 5 PCT).

Re Item VIII

Certain observations on the international application

- 8- There appears to be an inconsistency between the claims (e. g. claims 4-6) and the description (e. g. p 6 § 3-4 among others) since the claims refer to Lactobacillus paracasei and the description refers to lactobacillus casei.

Claims

1. Lactic acid bacterium belonging to the genus *Lactobacillus* capable of adhering to and essentially colonizing the intestinal mucosa, capable of preventing infection of
5 intestinal epithelial cells by rotaviruses and capable to grow in the presence of up to 0.4 % bile salts.
2. The *Lactobacillus* according to claim 1, which is selected from the group consisting of *Lactobacillus rhamnosus* or *Lactobacillus paracasei*.
10
3. The *Lactobacillus* according to claim 2, which is *Lactobacillus paracasei*.
4. The *Lactobacillus paracasei* strain according to claim 3, which is *Lactobacillus paracasei* CNCM I-2116.
15
5. Use of a lactic acid bacterium according to any of the preceding claims for the preparation of a ingestable support material.
6. The use according to claim 5, wherein the *Lactobacillus* strain is contained in
20 the support material in an amount from about 10^5 cfu / g to about 10^{12} cfu / g support material.
7. The use according to any of the claims 5 or 6, wherein the support material is a food composition selected from milk, yogurt, curd, cheese, fermented milks, milk
25 based fermented products, ice-creams, fermented cereal based products, milk based powders, infant formulae.
8. The use according to any of the claims 5 to 6, wherein the support material is used for the treatment and/or prophylaxis of disorders associated with diarrhea.

9. Food or pharmaceutical composition containing at least one lactic acid bacterium according to any of the claims 1 to 3.

5 10. The composition according to claim 9, which is selected from milk, yogurt, curd, cheese, fermented milks, milk based fermented products, ice-creams, fermented cereal based products, milk based powders, infant formulae, tablets, liquid bacterial suspensions, dried oral supplement, wet oral supplement, dry tube feeding or wet tubefeeding.
